

As of August 10, 2017

TWE17 OUTDOOR DEMO PROGRAM (bilingual)

August 31st, 2017, from 8:30 am to 1 pm

Miami Airport Convention Center

- VAC-TRON MC MINI COMBO SERIES

One of the most versatile sewer jetter machines on the market today. Combining high CFM vacuum with jetter capabilities at a low cost, puts the Vac-Tron Mini-Combo Hydro Excavation & Sewer Jetting System in a class of its own. **Features:** Cat jetter pump rated at 2000 psi (140 bar) at 15gpm (137.9 bar at 57 L/min) recommended for cleaning lateral lines up to 12" (30 cm) in diameter. 300' (91m) of 0.5" (1.3 cm) jetter hose with electric hose reel. **Options include:** The hydraulic boom or strong arm to maximize job performance by helping to reduce work fatigue that sometimes can occur from using a manually-controlled vacuum hose. The Mini-Combo is available either trailer-mounted or truck mounted for mobility on the job site.

Presented by: **VAC-TRON EQUIPMENT.** (For more info visit **Booth 611** - www.vactron.com)

- VACALL ALLJETVAC R SERIES WITH RECYCLER OPTION

Designed, built and supported by Gradall Industries, Inc., AllJetVac sewer cleaning machines, equipped with the new Recycler™ continuous water recycling system, can save an average of 5.7 million gallons of water per year. It delivers excellent jetting action and superior vacuum power to open clogged sewer lines and perform needed routine maintenance quickly and efficiently. The R Series model, with a rear-mounted hose reel and boom, accommodates operators who prefer to work away from engine noise. The rear hose reel delivers jetting action in any direction with an optional axial pivoting base. The Recycler option is available on AllJetVac models with either front or rear-mounted hose reels, letting you work all day without stopping for water refills. Water is vacuumed from sewer lines, put through a five-step filtering process, and then used for jetting back through the line. Eliminating refill trips saves fuel, as does the ability to operate a truck that's light in weight because it is not carrying water.

- RST HELIX - ADVANCED MANHOLE INSPECTION SYSTEM

The RST Helix is designed to accurately identify sources of inflow and infiltration as well as structural deficiencies in sewer and stormwater manholes. The fully automated system can be economically deployed by a single operator from a van, pick up, ATV or CCTV vehicle and will scan a typical 10-foot manhole in under a minute. The RST Helix has six high-resolution cameras that capture panoramic imagery of every surface of a manhole as well as six active 3-D sensors that record millions of spatial data points for precise measurements. The system automatically transmits the scan data to software where it can be reviewed in the office or the field. The inspection system includes the probe, cable reel, launching boom, and wireless control unit. The system data is compatible with NASSCO's MACP standard.

- MULTIPURPOSE WATER DISINFECTING MOBILE UNIT

Providing mobile production of HOCL (hypochlorous acid) for disinfecting drinking water, fracking and other oil and gas, waste water treatment, emergency relief, disease control, military applications. Using only water, electricity and salt.

Presented by **SOUTHLAND WATERS CORP.**
(For more info visit **Booth 217** - www.SouthlandWaters.com)

- IET-CRETE: BETTER, FASTER, & STRONGER THAN CONCRETE!

IET-Crete is the newest, most corrosion resistant replacement for concrete. Installed in just a few hours, and returning to service same day saves time and money compared to concrete. With the advantages of being molded into any configuration and slope, it is the future of the wastewater invert.

Presented by **PAINTS AND COATINGS, INC.**
(For more info visit **Booth 401** - www.paintsandcoatings.net)

- GAPVAX WET ONLY MC SERIES COMBINATION JETVAC.

The GapVax MC Series Unit, Combination JetVac, is a wet only machine, equipped with a unitized water and debris tank and double sub-frame. With a wide variety of sizes available, this is an ideal candidate for any size municipality, water and sewer district, or contractor who is cleaning storm drains, catch basins and/or sewers.
